

For Nursing Students

To support planning and updating personal study plan

Content

- The purpose of these slides is to help you plan both this academic year and your future studies. The slideshow is divided into two sections:
 - Core competence studies and
 - Complementary competence studies.
- The slide series highlights changes and recommendations related to study offerings both at Laurea and outside Laurea.
- Changes in the study units will only affect you if you have not yet completed the study unit.

General information about the degree in nursing

- The Degree Programme in Nursing (210 ECTS credits) consists of the following studies:
 - Core competence studies 180 ECTS credits (compulsory studies)
 - Complementary competence studies 30 ECTS credits , of which 15 credits is compulsory clinical practice.
- The curriculum for complementary competence studies is updated annually and the following year's offering is published on 1st September.
- Changes in the study unit selection and study offering are possible.

Core competence studies

- By default, you proceed with core competency studies according to your group's implementations, and there is no need for changes in core competence studies.
- Below are instructions for any adjustments needed in the personal study plan if you are not progressing at the pace of your group

Structure of the Nursing studies (spring 2024 onwards)

You can see the timing of your studies according to your own group in your PSP.

Instructions on the need for change in student's PSP

- PSP changes are only necessary for students who have not completed their studies in their own group or at the latest at the pace of the last study unit implementation.
- **An exception to this is the Research and Development Methods study unit**, whose study code will change from the autumn semester 2024 as the objectives have slightly changed. All students who have not yet completed the study unit by the time of the change will complete it with the new code. In the future, we will make mass editing of PSPs. In mass editing, the new study unit is submitted to the PSP if you have not yet enrolled for the study unit before. If you have earlier enrolment or the study unit is graded as fail, please note the change yourself.

Applies to those who started before autumn 2021:

Curriculum renewed

- The curriculum was renewed starting in autumn 2021. If you have started your studies earlier and you still have uncompleted compulsory studies, check with your teacher tutor which studies you need to complete.

Once you have made your choices, add your studies to your PSP and schedule your studies.

Add individual studies for your PSP with the code shown in the curriculum.

To add an entire module to your PSP search for a study in your PSP with the module name and select a module with the code mentioned in the curriculum. See one example in the picture below. If some of the study units in the module are already in your PSP, those will not be added. Thus, consider whether adding the whole module or just study units is more suitable to keep your PSP in order.

Curriculum (ops.laurea.fi):

Code	Name	Credits (cr)	2024-2025

Did you notice these studies

- In particular, the module "Other complementary competence" in the curriculum for complementary competence may receive new study units even at short notice before the start of enrolment.
- These studies are often offered on a one-off or fixed-term basis.

Discover the studies offered in the "Other Complementary Competences" module by clicking here.

Studies from other degree programmes and generic studies (1/2)

- You can also choose studies from Laurea's other complementary competence curricula and from common generic studies, taking into account the prerequisites: [The curricula can be viewed here.](#)
- You can also choose studies in the core competence of another degree programme as complementary competence, as long as they develop your competence and you fit into the group.
- Please note that the scope of elective studies is rather small and thus it is important to choose them carefully. Please consult your tutor teacher on these choices.

3AMK studies

- The 3AMK studies complement Laurea's study offering, so there is no need to separately agree on including them in your PSP if they produce new competence for your degree. **Given the numerous options available but limited space within the degree structure for complementary competence studies in nursing, it is recommended to discuss your choices during PSP discussions with the tutor teacher.**
- 3AMK offerings include a wide range of diverse and cross-disciplinary studies, and the study offerings are categorized into ten themes. You can find studies suitable your degree in each theme, depending on your interests, but **especially in theme '*Health and wellbeing*'.**
- For further information visit [3AMK site](#)

CampusOnline studies

- Including these studies in your PSP is possible if they produce new competence for your degree. Please consult your tutor teacher of the suitability.
